## BUILD A STRONGER CONSTRUCTION BUSINESS WITH MOBILOGIX

The construction industry is no longer just about hammers, nails, and hardhats. Today's construction sites are constantly moving and changing mazes of trucks, trailers, tools, and expensive storage equipment and containers. Not-too-mention all the men, women, contractors, and deliveries that move in, out, and across construction sites each and every day – all of which need to be tracked, monitored, and managed!

While construction asset management is crucial it can be tricky, Mobilogix is on the technological forefront of managing these types of assets. We keep track of tools and equipment of all shapes and sizes on construction sites and will help keep your business running smoothly.

Asset tracking on construction sites with Mobilogix also helps prevent theft and loss of equipment. We ensure that the right assets are in the right place to help ensure the smooth running and completion of your projects. The Mobilogix solution suite provides accurate tool and equipment locations, while also, and just as importantly, helping to prevent equipment malfunction by monitoring fluid levels and maintenance needs and, therefore, repair schedules.

All Mobilogix products come with a core set of functionalities that are easily customized to best suit your specific project or need. No matter your construction application or project scope, Mobilogix will create and customize an affordable, easy-to-deploy, unique, and high-quality solution for you.

With the industry's best technology and solution suite,  
it's easy to see why some of the world's most successful  
Construction companies choose Mobilogix.

# Why Work With Mobilogix To Manage Your Construction Assets?

## Increased Equipment and Tool Utilization

Mobilogix enables workers to always locate tools and other equipment quickly and easily, preventing the need to stop the assembly line and search for a misplaced item. Mobilogix also provides insight into how often certain equipment is used and how it is operating, allowing you to better control the function and depreciation of high-value assets.

## Cost Savings

When tools, equipment or parts are not easily locatable, it leads to wasted man-hours, asset replacement costs and potential mistakes – all of which negatively affect a construction sites operation's bottom line. By preventing these situations with Mobilogix, construction companies quickly and regularly enjoy rapid ROI.

## Easily Track Shipments and Asset Movement

One of the biggest benefits of working with a solution from Mobilogix involves the huge increase in visibility that can be achieved across shipping, receiving, and transportation processes. You will know exactly where all your assets are across your construction site and supply chain at all times.

## Theft

Theft is a constant risk in the construction industry. In the U.S., statistics from the National Insurance Crime Bureau indicate that up to \$1B worth of equipment and tools are stolen each year. A study by insurers Allianz Cornhill suggests that theft costs the UK construction industry around £800m a year. According to the Kroll Global Fraud Report, over a third of construction, engineering and infrastructure companies worldwide experience theft of physical and stock assets over the course of every 12 months.

Relatively small tools and equipment are often targeted as they are more mobile and can be easier to steal. But larger assets are certainly not immune, however, and the Allianz Cornhill report found that more than \$890M of construction plant equipment, including excavators, compressors and even cranes, are stolen annually in the U.S.

## Better Adherence To Safety Regulations

Mobilogix helps managers and business owners keep track of different tools and machinery to ensure they are brought in for scheduled maintenance. Whether its fuel levels, heat sensors, or jarring movements, Mobilogix makes it easy to know the exact status of your assets no matter the day, time, or location. This ensures that essential items are well-maintained, last longer, and don't cause accidents or injuries.

## Peace-Of-Mind And Increased Production

Mobilogix creates an overall sense of peace-of-mind by enabling you to always know where your important and valuable assets are. This will help reduce the emotional stress that occurs when assets are out of place or stolen. The reduction of stress enables users of Mobilogix solutions to better focus on their core competencies, therefore increasing their production and positively impacting the bottom line of their organizations.
