

MicroMobility

SMALL IS BEAUTIFUL

AND MICROMOBILITY IS THE FUTURE OF URBAN TRANSPORTATION. WORK WITH MOBIOLOGIX TO TRACK, MANAGE AND OPTIMIZE THE FUTURE OF YOUR ASSETS!

Manage and Optimize Your Assets

E-scooters and dockless bicycles appeared in cities suddenly and in great numbers, showing a real demand for single-occupant vehicles, while also creating challenges for manufacturers, providers, and government agencies alike.

With an already established solution and client-base in the MicroMobility market, Mobilogix has established itself as the industry's leading provider of asset monitoring and data optimization solutions.

And Fusion, the Mobilogix cloud software platform, enables the best possible management of those assets by constantly, consistently, and factually gathering, aggregating, and clearly displaying pinpoint data. Fusion is also easily configurable so you can tailor to your specific needs and adjust as those needs change.

All Mobilogix products come with a core set of functionalities that are easily customized to best suit your specific project or need. No matter your MicroMobility application or project scope, Mobilogix will create and customize an affordable, easy-to-deploy, unique, and high-quality solution for you.

With the industry's best technology and solution suite, it's easy to see why some of the world's most successful MicroMobility companies choose Mobilogix.

Why Work With Mobilogix To Manage Your MicroMobility Assets?

Industry-Best Tracking Capabilities

No other tracking solution compares to Mobilogix' capability to keep track of your assets. Inside. Outside. Moving back and forth from inside to outside and back again, the connection between a Mobilogix device and your high-value assets never loses connection, and you never lose sight of your property.

The Best Possible Data

Based on the premise that precise data drives the best possible decision making and, as a result, creates more successful businesses; Fusion, the Mobilogix cloud software platform, enables the best possible management of your assets by constantly, consistently, and factually gathering, aggregating, and clearly displaying pinpoint data.

Flexible Platform

Fusion is also easily configurable so you can tailor it to your specific needs and adjust as those needs change. And with the MicroMobility market expected to grow exponentially over the next decade, having a flexible solution that is able to easily grow with you is of paramount value.

Unlimited Assets and Users

Fusion can securely track an unlimited number of assets and you can allow as many users as you need to access your comprehensive and optimized data.

Theft

Theft is a constant risk in the MicroMobility industry. In the U.S., statistics from the National Insurance Crime Bureau indicate that up to \$1B worth of equipment and tools are stolen each year. Relatively small tools and equipment, such as scooters, are often targeted as they are more mobile and are easier to steal.

Save Time And Money

With Fusion, combined with Mobilogix' tracking solutions, all your data is integrated into the platform, replacing outdated processes and the need for spreadsheets until you need or want to export data back out to Excel or another program.

On-Demand Access

All of your data and assets are available on any device, anywhere, anytime you need it.

Custom Reports

Fusion lets you prepare reports the way you want to see and share them – organized by date, category, location, and any other statistic or field you choose. Communicate the information you want to communicate to the audience you want to communicate with when you need to do so.

Industry-Leading Customer Support

24/7 access to the world's best customer support team comprised of experts that understand our products and the needs of the MicroMobility industry.

Contact Us Today! to find out how we will work with you to create a custom and unique asset tracking and monitoring solution for your Micromobility industry business that will help optimize your operations, as well as your global asset management needs.
